PROJECTS

Covidit.world | Repo: github.com/alejo4373/covid-it - Live: covidit.world

- A website to share aspirations, reflections and appreciations through a post-it note with the world after and during the COVID-19 Pandemic. A user can share a note under Want to Do, Learned or Grateful For.
- Awarded Winner in the Virtual Community track and Audience Choice award in the Combating the Coronavirus Competition by the NYU Entrepreneurs Network 2020.
- Built with HTML, CSS & JavaScript using the Pug templating language. Node.js and PostgreSQL are used as back-end services.
